In 2015, the cost of the Autodesk version of AutoCAD topped \$2,000, and the software package has been around for nearly 25 years. For a business looking to expand their architectural or engineering company, AutoCAD is the CAD app of choice. In this review, we will take a look at how AutoCAD can serve as a capable assistant for the mechanical engineering professional. Step-by-step construction drawings are a common feature in AutoCAD. This feature allows for users to draw in components that are already formed in metal, wood, plastic, or other materials. AutoCAD Architecture There are three main features in AutoCAD Architecture. The first one is the AutoCAD Architecture User Interface (AIUI). This is where you create a drawing or edit the properties of a previously created drawing. The AIUI is divided into four main panes that are accessed through the buttons on the left side of the screen. For drawing creation, you click the New button, and for editing you click the Edit button. On the left of the main screen, there is a menu bar. You can access the menu bar by moving your cursor over it and pressing the menu key. The other two are the Layout and Properties panes. These two panes are the most commonly used

panes. The Layout pane is where you edit the geometry of a drawing. If you select an object (for example, by clicking on it), the Properties pane displays the properties of that object. You can view any number of objects by selecting the Show All Objects button. This leads us to our next feature. AutoCAD Architecture's Architecture User Interface (AIUI). ‘Star Wars: The Force Awakens’ delights audiences, honors the legacy LOS ANGELES — The buzz surrounding "Star Wars: The Force Awakens" is still strong. Disney confirmed Thursday that worldwide ticket sales are outpacing "The Force Awakens" ticket presales, with "Force Awakens" accounting for about \$8 million in ticket sales Thursday through Sunday, compared with about \$6 million in presales. The all-important China market also contributed to the momentum, Disney said in a statement. Thursday's debut marks the first time a "Star Wars" film has opened in China, where fans of the franchise have been known to wait in line for weeks to get tickets. The studio reports that it sold \$21.7 million worth of tickets Wednesday and Thursday. In North America, "The Force Awakens" has sold \$7.9 million worth of tickets Thursday through Sunday, and the studio projected \$26.6 million in domestic ticket sales on Monday. "Star Wars: The Force Awakens" has earned rave reviews and already has become one of the biggest box-office hits of the year, thanks to an early December opening date. Its \$500 million worldwide haul is the third-biggest December debut, after "Jurassic World" and "Jumanji: Welcome to the Jungle." In the U.S., "The Force Awakens" is on pace to top "Star Wars: The Phantom Menace," the 1999 film that ignited the "Star Wars" franchise and opened with \$69 million domestically on its way to a \$389 million global take. It also ranks as the eighth-biggest opening-weekend gross for 2015. "The Force Awakens" shattered the record for the best domestic opening-day Thursday haul ever, earning \$57 million in ticket sales on Thursday. According to Box Office Mojo, the film has also set records for Thursday and Friday
