Q: How to save an Image in hidden field on django? how to save an image in hidden field with Django? I am using some captcha and i want to save the result in my hidden field I tried this form.fields['captcha'] = render_to_string('captcha_img.html', {'form': form, 'answer':answer}) A: This can be done like this: def post(self, request, *args, **kwargs): ... with open('image.jpg', 'rb') as f: self.hidden_field['file'] = f ... A: render_to_string() returns the rendering result as a string. You could do this: import cgi form.fields['captcha'] = cgi.FieldStorage(form=form, filename='image.jpg', enctype="multipart/form-data") Q: Check if string contains non-printable characters I need to check if the String contains non-printable characters. One of my teacher did it in this way: public static boolean hasNonPrintableCharacters(String s) { boolean hasNonPrintableCharacters = false; for (char c : s.toCharArray()) { if (c!= '\u0000') { hasNonPrintableCharacters = true
