① A Unique Fantasy World Created by the Elden Ring Creators Elden Ring is an action RPG developed by the Elden Ring Creators, the makers of Dragon's Crown and Malicious Rebirth. The game is set in an entirely different world from the fantasy world of Dragon's Crown, but follows the same story. The creator was inspired by the fantasy settings of Final Fantasy, Kingdom Hearts, and Dragon's Crown and made this unique fantasy world. ② A Special Platform with Practically No Restrictions Elden Ring was developed on the Unreal Engine 4, the latest and most powerful engine in the Unreal Engine family, which allows users to enjoy the game on practically any platform. Elden Ring uses powerful rendering engines that highlight the details in the environment and characters, which allow each frame to have a richer feel. And for the first time, the game features a 24-hour day/night cycle that you can explore freely during the day and night. For more information, please visit:
