## Photoshop CC 2019 [Win/Mac] [Latest]

In this tutorial, we will learn how to create and edit an emoji using Photoshop Elements. Photoshop Elements comes pre-installed on most computers. [Video Tutorial: Click Here To View/Download Source Files](#) We are going to work on a 9-Emoji-Set, but you can choose any emoji you want from up to 26 emojis available. We are only using 9 emojis in this tutorial, but you can use any emoji you like. [How to Make an Emoji Using Photoshop Elements](#) The process of making a mock up is not complicated at all. There are numerous steps that we can follow to make an emoji. Let's check them out: [What Photoshop Elements \(PSE\) Offers Before learning how to make an emoji, let's first know what Photoshop Elements offers. This tutorial uses PSE version 12.0.5, which is current.](#)

1. First, we will install the Photoshop Elements app (app available on Play Store or App Store).
2. Now we will follow the tutorial to make a simple emoji. After installing Photoshop Elements, open it, create a new document, and load the logo or logo image that you want to work with. Preparation: Download the Photoshop Elements app from your App Store or Play Store. Download the logo that you want to work with in this tutorial. Tutorial: 1. Start with an empty layer and draw lines to indicate the areas that you want to use. 2. Now draw the shape of the emoji using the X-Ray feature. 3. Use Photoshop Elements' 4 Hue Variation feature to split the lines and the white areas. 4. Now the lines are separate from the white areas. 5. Now you are all set to start making an emoji. Here you will add a color to the emoji. A color is a tone or a shade of the whole image. 6. When you add a color in PSE, you can decide to fill the whole line or leave it as it is. 7. In this case, I am going to fill the color all the way. 8. Now change the color to the emoji color that you want and make it a shape. 9. The emoji color that you chose is the same with the logo. 10. Save it and it's 388ed7b0c7
