Why use Scanmetender Standard instead of ExScan or OpenPortScan? Because Scanmetender Standard is an integrated scanner, which contains the scanners ExScan and OpenPortScan. It unites the most important features of the two scanners in one package. How does Scanmetender Standard work? Scanmetender Standard doesn't use the built-in firewall of the Windows operating system to scan your system. Therefore Scanmetender Standard needs an authorization module. When do I have to pay? You do not have to pay because Scanmetender Standard is freeware! However if you want to use other features which require payment you may use the Trial version of Scanmetender Standard for free, which expires after 30 days. What is the difference between the trail version and the Version Standard? The trial version contains

## Scanmetender Standard Full Version [Updated] 2022

Scanmetender Standard Cracked Accounts is a multifunctional network scanner and security suite, which is not only able to show you open ports of your computer, but also to close them. The main keywords of Scanmetender Standard 2022 Crack are customizability, interface and functionality. Scanmetender Standard supports TCP and UDP port scanning, while you can choose whether you want to scan multithreaded or single threaded. Scanmetender Standard is multilingual and skinnable, it uses language packs in the \*.slp (Scanmetender language pack) and is translateable in every language you want. The core languages of Scanmetender Standard are English, German and Hebrew. More languages can be downloaded on Scanmetender[Soft]. If you want to resolv any domains in your network or to ping any IP addresses, you can use the advanced domain service of Scanmetender Standard, which is able to ping unlimited ranges and to make WhoIs requests. After a port scan a lot of people do not know what to do with the open ports. In Scanmetender Standard this not a problem. You are able to close ports and to block process names trough the intergrated firewall. However if you want to use your own firewall instead of the Scanmetender Standard integrated firewall, you will find help in the Firewall configuration file, which shows you in five steps how to close ports in famous firewalls.
