For PC, Pro Tools 12 requires at least Windows 7 64-bit, core i5 processor, 4GB RAM, 15 GB disk space. I think by default you have to have a major version for every major release of your program. And I think you get that automatically. Are you sure you have a minor version for every minor version of your program? Maybe you can put in your doc or the README file what you are using. I have no idea how you define "core technology". _____ Everyone has a unique number. In your case it's 1580085421. If you want to find me you need a phone, not just an IP address. - Eim In defense of anger (and its contrary, happiness) - gwern ===== mc32 It's the perfect example of how much scientific research is affected by conflict of interest. The study groups are influenced by the commercial or social interests behind them, leading to biased and inconclusive results. I don't think we can generalize or draw causal inferences on the impact of conflict of interest. There are few studies that don't

depend on commercial interests because they cannot sell the tools and methods used. I'd like to see studies done in the market of mindfulness, where mindfulness is acknowledged to be a commercial product, and studies of spirituality where there would be private/commercial interests at stake.

~~~ gwern There's a long tradition of finding this: [ invent-f...]( findings-for-commercial-interests) If you've been a longtime listener of TWiT, you might have heard Todd mention Eris-G back in March. From that point, he'd been saving it for an important purchase. Now, the wait is over, as he's sharing his full review on Geekhack. Check it out below, along with the specs. As Todd mentioned in his review, the Eris-G isn't simply an analog filter, but a good analog emulation of a high-end digital EQ. The
