### What's New In ThumbDesk?

SUMMARY ThumbDesk for Windows lets you create app launchers. It offers a unique browsing approach: instead of storing information in a database like most launchers, ThumbDesk uses Windows Registry instead. This makes it possible to manipulate launchers at all times, without relying on a database. Requires Windows 7, Windows 8 or newer Free ThumbDesk requires an internet connection to download target files (see notes below). You can also manually select files to add them to the registry. ThumbDesk requires 7-zip to extract files (to convert ISO to NTFS). ThumbDesk requires an internet connection. ADDITIONAL INFORMATION Supported OS: Windows 7, Windows 8 or newer Requirements: For some programs, the installer will not work unless you have .NET framework 3.5 or later installed. Find out whether you already have it installed by searching in the Start menu under Programs for the location of the .NET Framework. FILES INSTALLED NOTE You can add programs to your launcher using Internet Explorer. Just select File, Open, Browse. You can drag and drop files or you can double-click on them. To use the launcher, you will need to install it (Note, you cannot install the Launcher in the Program Files folder since the Launcher overrides the standard Program Files folder). The Launcher allows you to put shortcuts of programs in the Windows Start menu, Laptop or desktop Start bar, or the system tray, as well as to transfer launchers to USB flash drives and other removable storage media. ThumbDesk is free to use for personal use, but it can also be used by commercial firms on their computers. The Launcher includes two parts: a launcher engine and an interface. You can configure and switch between launchers by using the Launcher interface. The launcher engine keeps track of what launchers and application versions you have installed on your computer. If you delete one or more launchers, or if you add a new launcher, you will need to update the launcher engine so that it knows to delete or add the new launcher to your computer. The launcher engine is not specific to ThumbDesk and can be used with any launcher application. The launcher engine keeps all the information about launchers and program versions that you install, up to 30 launcher programs can be installed. INSTALL NOTES 1. The Launcher updates the registry to create the launcher program if the launcher program isn't
