About the FireTry: This is a top down, tactical tank based game, with only one lane. You have to drive to the other side of the map and destroy the other player's tanks. The more tanks you destroy the higher level you get. The more tanks you destroy the higher level you get. But you also need to get more armored tanks so you get more weight and top speed. Your tank can be upgraded. The tanks are grouped by 4 as a team, and you have to destroy the enemy teams before they destroy yours. You have a global bonus for destroying other players. you're walking and moving. So you can jump too. The left button is a button to use the menu. The right button is a button to do your attacks. The views of the game: You'll see mostly the tank and the players, the level editor is done pretty well, to where you can see inside the tank to see how you can upgrade it, and how you can damage it. We added loading and saving in the online mode. You can also try to use a certain feature in the map editor. The online mode works well, but it get's a little bit annoying when it has queue's because its hard to figure out if you can connect. The map editor is just a simple editor, to where you just click the direction of the tank and it's updated. You can pick the direction of the tank by c9d1549cdd
