I purchased the Canon EOS 6D (18 megapixel) on May 7, 2014 and when I attempted to mount the Sigma 2-10 on it, I found that there were some compatibility issues. These issues include: The EOS 6D does not recognize a value of 3.0 The EOS 6D does not recognize a value of f/3.0 The EOS 6D does not recognize a value of f/10.0 Does anybody know if this is just a first-gen issue? I would also like to know if there are any ways to remedy this? A: Sigma's 2-10 is a recent lens, 2013-2015, so it's too new to be supported by the EOS 6D. You'll need an earlier one or a different lens. SALT LAKE CITY — A new proposal would place legal age restrictions on pornographic websites. Utah Representative Chris Stewart, a Republican from Alpine, and Rep. Adam Juhnke, a Democrat from Ogden, have proposed a bill in Congress that would impose a US\$250,000 fine on anyone who knowingly fails to “make reasonable efforts to remove” child pornography from a website, according to the Hill. Additionally, the site operators would face a US\$500,000 fine if their site knowingly fails to make “reasonable efforts” to remove child pornography from its users’ computers. Stewart, who has often pushed for government censorship of pornography in the past, said the proposal is an attempt to protect children and prevent sexual predators from exploiting them. “We now have more tools than ever before to assist in this fight,” Stewart said in a statement. “We have a unique opportunity to address online threats to children more effectively by building

A: Вы нашли развернутый рабочий пример, смотрите, что в нем не указано. Там посмотрите формат записи и копирку для mp3. Ну и ладно, если в нем проблемы и нет, то сразу попрошу поправить) Novel endoscopic approach to correct bronchial sleeve dyskinesia. Bronchial sleeve dyskinesia is a peculiar form of bronchial motility disorder in which the distal portion of a peripheral airway shows hyperkinetic activity such as repetitive displacement of its walls, and does not affect the proximal portion that regulates airflow. However, no method for bronchial sleeve dyskinesia has been established to date. We developed a novel endoscopic treatment of bronchial sleeve dyskinesia to minimize the airway damage caused by a repeated bronchoscopic procedure, and present here the first case with successful treatment of bronchial sleeve dyskinesia using this method. A 51-year-old woman with severe dyspnea was referred to our hospital. Bronchoscopy revealed that the bronchial sleeve dyskinesia was present in the right upper lobe, and the distal portion of the bronchial sleeve dyskinesia was treated with a metal stent. The patient recovered from dyspnea and had no recurrence of the bronchial sleeve dyskinesia during the 12-month follow-up. No airway damage was observed during the procedure or at follow-up. The present patient was successfully treated with a novel endoscopic approach for bronchial sleeve dyskinesia.Q: How to use a Python Json Response
