Follow the news section for the latest! Official Website: Facebook Twitter Google+The True Icon of Art All over the world, iconic structures have been a symbol of a destination’s beauty, culture, and history. Many of these buildings are the architectural highlight of every city, known by millions of people around the world. Bizarrely, some of the most famous building in the world are not massive skyscrapers, but roadside shack-like structures. From ramshackle motels on the beaches of North America to the colonial cottages in the heart of New Zealand, tiny roadside shacks are the true icons of the country they’re in. They may be small, but they have a great impact.

1. The Balsam Motel in Lake Keowee, South Carolina In a sleepy South Carolina backwater, located about 1,500 miles from the nearest major city, is a marvel of modern architecture. The Balsam Motel was built in 1970 by the Schaller family. Originally, it was advertised in the newspaper as the “royal Balsam Motel.” Eventually, when Schaller felt that the road was becoming busier and more crowded he added a second motel with a modern feel. The structure is built from recycled farm buildings, with a bizarre inverted arch shape. For over 35 years it has stood on the main highway of a sleepy South Carolina town.

2. The Wretched Awful Motel in Western Australia The Wretched Awful Motel has been lovingly called the “kookhouse of Australia,” for the odd appearance of the building. Located on a dirt road in Wudinna in Western Australia, it is a rare example of a motel built without a highway. Painted bright red, it’s a square structure that houses 12 rooms, decorated with brightly-colored glass accents. One of its alleged functions was to provide single men a place to find romance. It even had a flower garden.

3. The Pyramids of Mars in Northumberland, New South Wales The Pyramids of Mars is part of the beautiful Craggy Range, an area listed as a national park in New South Wales, Australia. The building consists of six ramshackle cement pyramids huddled together. The pyramids have been an iconic part of the landscape for years, with
