# Embarcadero RAD Studio 10.2.3 Tokyo Architect 25.0.29899.2631 ~UPD~

Next 10.2 Tokyo BLE Framework can't detect Android devices, works on 10.1... How many times can I try to install RAD Studio 2007 with Interbase ? I can download it from the official site (for Windows, Linux and Mac) but I get the error "The application cannot detect 'devices'". I have tried uninstalling and reinstalling several times and I have tried my best to find it in the device list (as far as I understand RAD Studio does not support Windows 9) to no avail This appears to be a RAD Studio 2010 issue - if you want to use FireMonkey this shouldn't be a problem. You can find information about it here.
