Again, it's strongest when you drag over outline shapes. If you can't get an exact edge on the photo using one of these tools, the Photo Eraser brush is right there at the top of the tool palette (see image above). Select it, and you'll see a small eraser icon near the top left of your canvas. Tap and hold to erase unwanted areas of a selection, and you'll see how the tool can round off some edges of the ragged raw edges of an image. Collect the edges of a selection using brushes, and the eraser tool will help smooth things out a bit. With this tool, you can erase whitespace from a photo or find thorns or other stray hairs growing out of a headshot. To do this, the "Select," "Erase," and "Brush" menus appear at the bottom of the canvas when you select a piece of your paint palette. At the bottom left of your canvas, you'll see the foreground and background color swatches. Select any pink, of course, from ice-cream-cone orange to deep pink. Select "Erase," and you'll see your selection divvied into the color bins. The RS2000

build is available for Mac and Windows, although Windows options for the newest subscription plans are only available on the Mac app. It's a great 20-megapixel RAW shooter for the price and can produce excellent images. Unfortunately, in the past several releases the lens quality has been a disappointment. Recent Nikon updates have raised the bar for lens features, so we would expect the latest iteration of this camera to perform at a higher level.
