New! SyncMaker PRO 2.5.1 New! Resizable timeline dock New! Full multi-monitor mode New! Add Hotkeys to timeline New! MIDI input support SyncMaker PRO is a software that is designed to sync multimedia content, both video and audio, and can also be used to stream it to a number of computers. You can play two or more files simultaneously or send them to multiple screens or video projectors. As long as you are not afraid of performing advanced tasks, you should be able to use SyncMaker PRO easily and without any complications. In addition, all the features are provided for a low price. Support for a wide range of audio and video formats, a dock for the timeline and a hotkey system are just some of the features that make SyncMaker PRO a useful application. With SyncMaker PRO you are able to create smooth transitions and synchronize up to six clips in either play or playlist mode. Additionally, you can also create a video to MP3 stream, add hotkeys to the timeline, browse through video and audio files in the timeline and work with MIDI devices. With SyncMaker PRO you can create and manage a playlist. This makes it possible for users to stream synchronized video content to multiple screens or projectors. In this case, both an audio and a video playback are displayed simultaneously on each screen. The interface for SyncMaker PRO has been designed so that it can be easily operated and provides a simple overview of the project. It's a feature that makes the application stand out from its competitors. While the primary target market for SyncMaker PRO is the creation of multimedia art shows, it's also capable of handling a large number of simultaneous streams. Installing SyncMaker PRO isn't difficult and the application comes with comprehensive documentation that explains how it can be used. From the same window you can load clips, configure hotkeys, import and export settings, assign content to playlists and work with video and audio files. The settings for SyncMaker PRO are saved so that you can easily load them again later on. The capabilities of SyncMaker PRO are currently limited by the software, but we're confident that new versions will be able to keep up with the time. Using SyncMaker PRO you can easily stream video and audio content to a large number of screens or projectors. Additionally, the application is capable of working with several audio formats and an immense range of video formats, which

SyncMaker PRO

SyncMaker PRO is a piece of software that is especially designed for those who want to create a multimedia show that requires video and audio streaming on a number of computers. With it you are able to sync each frame of a video and broadcast it to multiple computers. Straightforward interface Right off the bat, syncMaker PRO is an application that won't confuse you when it comes to loading the media files, synchronizing and playing them. It displays a plain and user-friendly graphical user interface which makes it accessible to just about anyone who is at least familiar to this kind of software. From the same main window you are able to load as many clips as you need, assign hotkeys and MIDI devices, navigate through the video, set the sync time and toggle the playback method. Support for multiple connection types and media formats To be able to successfully use syncMaker PRO, you need to install it on all the computers that will be participating in the project. On one PC you will set syncMaker PRO as the master controller, while the other installations will be receiving the sync information and will play slave roles. Getting syncMaker PRO instances to communicate shouldn't be a problem because the application can handle LAN, TCP/IP, Internet and COM connections, making it a viable solution for just about any scenario. Since the type of connection you use greatly influences output quality, it's really good that syncMaker PRO supports playback for a wide range of popular formats such as WMV, MPEG-2, VOB, DV, AVI, WAV, MP3 and AC3. The application is mainly focused on helping out with multimedia art shows or elaborate presentations in which you need perfect sync between the monitors or projectors. For this reason, syncMaker PRO enables you to control playlists using hotkeys and it even supports MIDI input which ultimately makes it a great choice for DJs that want to stream music through a large space with multiple rooms. Effortlessly stream synchronized video and audio To sum things up, syncMaker PRO is easy to install and configure, can handle a large number of streams and can be automated. All of this making it a practical tool. KEYMACRO Description: "Is this software for you?
